Ainul Yaqin, Software Engineer

Yogyakarta, Indonesia, akinpasha82@gmail.com, +6281917973875, akin01.github.io

PROFESSIONAL SUMMARY

Software engineer specializing in building scalable systems and deploying AI solutions in production environments. Proficient in analytical thinking, organization, and teamwork to deliver efficient and robust software products. Focused on leveraging fast learning and technical expertise to drive innovation and operational excellence.

WORK EXPERIENCE

Mar 2021 — Feb 2026 | **Python and AI Tutor, Superprof** | Online

- Developed customized Python and machine learning lesson plans to improve learner comprehension and accelerate skill acquisition.
- Clarified complex programming and algorithm concepts to enhance student problem-solving abilities and coding accuracy.
- Monitored student progress and adjusted teaching methods to ensure consistent improvement and sustained engagement.
- Implemented practical exercises and projects that reinforced theoretical knowledge and increased real-world application confidence.

Jul 2024 — Jul 2025 | **AI Engineer (Freelance), RIMM Sustainability** | Remote (Singapore)

- Developed LLM-powered internal tools to support team tasks, including automated documentation and report generation that fulfilled client standards.
- Designed deployment strategy for the data generation pipeline, utilizing GCP services.

Sep 2023 — Feb 2025 | **Tech Lead, Patron Indonesia** | Remote (Jakarta)

- Architected scalable, cost-effective system architectures that optimized performance and reliably met expanding user demand.
- Led an engineering team of 6 developers in designing and delivering an integrated data analytics dashboard for executive decision-makers.

Project-based | **Tech Lead, Insightful Data Indonesia** | Remote (Aceh)

- Led the engineering team in developing a high-performance spatial analytics dashboard to deliver real-time flood monitoring for Aceh Province.
- Connected affected citizens, disaster relief decision-makers, and humanitarian organizations to coordinate emergency response.

Oct 2022 — Sep 2023 | **Backend Engineer, KMPlus Consultant** | Remote (Jakarta)

- Engineered scalable API solutions that streamlined data processing workflows, significantly enhancing system responsiveness and operational efficiency.
- Developed robust data caching mechanisms to reduce database load, improving system throughput and enhancing user experience during peak traffic periods.

Aug 2022 — Jan 2023 | **AI Engineer (Intern), Nodeflux** | Remote (Jakarta)

- Researched novel machine learning techniques to enhance video analytics capabilities, resulting in improved event detection and operational decision support.
- Researched AI video analytic implementation for surveillance capability
- Researched deployment strategy for edge AI solution

EDUCATION

Aug 2019 - Aug 2026	**Engineering Physics, Universitas Gadjah Mada**	Yogyakarta, Indonesia
Aug 2023 - Jan 2024	**Backend Java, Binar Academy X BCA**	Remote (Jakarta)

SKILLS

Ability To Work In A Team	**Analytical Thinking**
Fast Learning	**Build Scalable System**
Build AI in Production	**API development**
Data analysis	**Amazon Web Service (AWS)**
Google Cloud Provider (GCP)	**Cloudflare**

LICENSES & CERTIFICATIONS

Jul 2025	**Complete Guide to Serverless Web App Development on AWS , Linkedin Learning**
Jul 2025	**Master Retrieval-Augmented Generation (RAG) , Linkedin Learning**
Jun 2025	**Data Engineering Foundations Professional , Linkedin Learning (Certificate by Astronomer)**
Jun 2025	**Become an AI Engineer , Linkedin Learning**
Jun 2026	**Develop Your Rust Skills for Data Engineering , Linkedin Learning**
Dec 2021	**Deploying Machine Learning Models in Production , DeepLearning.AI**
Apr 2022	**Practical Data Science Specialization , DeepLearning.AI**
May 2022	**DevOps on AWS Specialization , Amazon Web Services (AWS)**

PROJECTS

Solid-Email (https://github.com/akin01/solid-email): An email template library based on JSX for solidjs framework. This library gains the best rendering performance several libraries in email template universe. Tanggapi Aceh (https://tanggapi.acehprov.go.id): A geo-based website that track the report of peoples of Aceh. It renders the data in real-time through map by region-based with advance data filtering and visualization.
